MEMORANDUM

SUBJECT: Removal Assessment at NPL Sites - No Additional Action
Recommended for North Market Street - Spokane,
Washington

FROM: Robert E. Kievit *Robert E Kievit*
Hazardous Waste Coordinator
Washington Operations Office

TO: Files

The North Market Street site has been reviewed and it is my judgement that this site does not represent an immediate risk to public health and/or the environment, and that no further action by the removal program is recommended.

This judgement is based on the following:

Sampling by the Washington Department of Ecology in the mid 1980's confirmed that soil and groundwater at this site is contaminated with hazardous substances and that a plume of contaminated groundwater extends off site. The state supplied bottled water to affected well owners until city water service was extended to this area in 1991. The site is located in an industrial area and is presently fenced. In July 1992 four property owners agreed to conduct a Remedial Investigation pursuant to an Agreed Order with the state.
